

PRESS RELEASE

C2 NETWORKS CELEBRATE FIRST YEAR IN SURREY TECHNOLOGY CENTRE

C2 Networks celebrated their first year in the Surrey Technology Centre on the Research Park during April.

The company moved from Send, nr Woking, into the Surrey Technology Centre over Easter 2006, prompted by their growth and their need for meeting room facilities to demonstrate their business software solutions to customers.

“We now realise we should have done this years ago. We have had an excellent year with a significant increase in business, which has prompted the need to increase our team” says Martin Smith, Managing Director. “There is no doubt about it, we are now attracting higher calibre customers and have significantly increased the offering to existing customers as a result of being in the Technology Centre. As an unexpected bonus some of the other businesses based here have also used us”.

C2 Networks provide technology driven business solutions, particularly focussing on Sage Accounting and CRM software products. They have recently become

dealers for Sage Line 50 products.
